-- ABSTRACT OF THE DISCLOSURE

A handle for scissors including an embedded joint portion that is embedded in the finger support of the first handle portion as a joint portion of the first blade and expose from the intermediate section. The first section and the second section extend from the intermediate section to the perceptible portion in the inner end, respectively, with the intermediate section arranged between the first and second sections. The finger support of the first handle portion includes outer cover portions each serving as a finger contact portion. The outer cover portions are formed in the first section in the second section, respectively, for covering the embedded joint portion of the first blade. --
